Tip: Start by filling in the names that have a unique number of letters. E.g. "CRAB" is the only name with 4 letters, so there is only one place it can go on the grid.

Can you help Alfie and Bella fit the names of 14 creatures from the Cretaceous Period into the grid? There is only one way to make them all fit, so make sure another name does not fit in the same space before you write it in. All the names should be written top to bottom or left to right.
